

# Outdoor Learning

## Intent

At Meir Heath Academy we believe all children should have the chance to take their learning outdoors. We seek to provide outdoor learning opportunities which enhance and add value to our curriculum. Outdoor Learning takes place as part of our broad and balanced curriculum, which helps to provide children with the skills, knowledge and understanding they need to develop into well-rounded, informed individuals.

Learning outdoors can have a positive impact on pupils and enables them to take part in varied learning experiences. When learning outdoors, children develop their creativity, problem-solving, independence, confidence and more. It also provides an opportunity to take part in lessons and activities which cannot be recreated indoors.

Outdoor Learning lessons are planned to enhance each year group's topic. There are also other opportunities for children to get involved via after-school clubs and through our 'Go Outdoor' sessions which children's adults are also invited to participate in.
